**The premier provider of industrial weighing solutions in the area.**

Since 1946, we have forged a reputation as the leading provider of innovative weighing solutions and services. We are trusted by our customers to help solve the most difficult operational challenges across a wide range of industries. Our employees are highly trained, always ready **To Serve**, and take great pride in all we do. We offer unmatched quality, comprehensive service offerings, and a truly Weigh Better® experience.

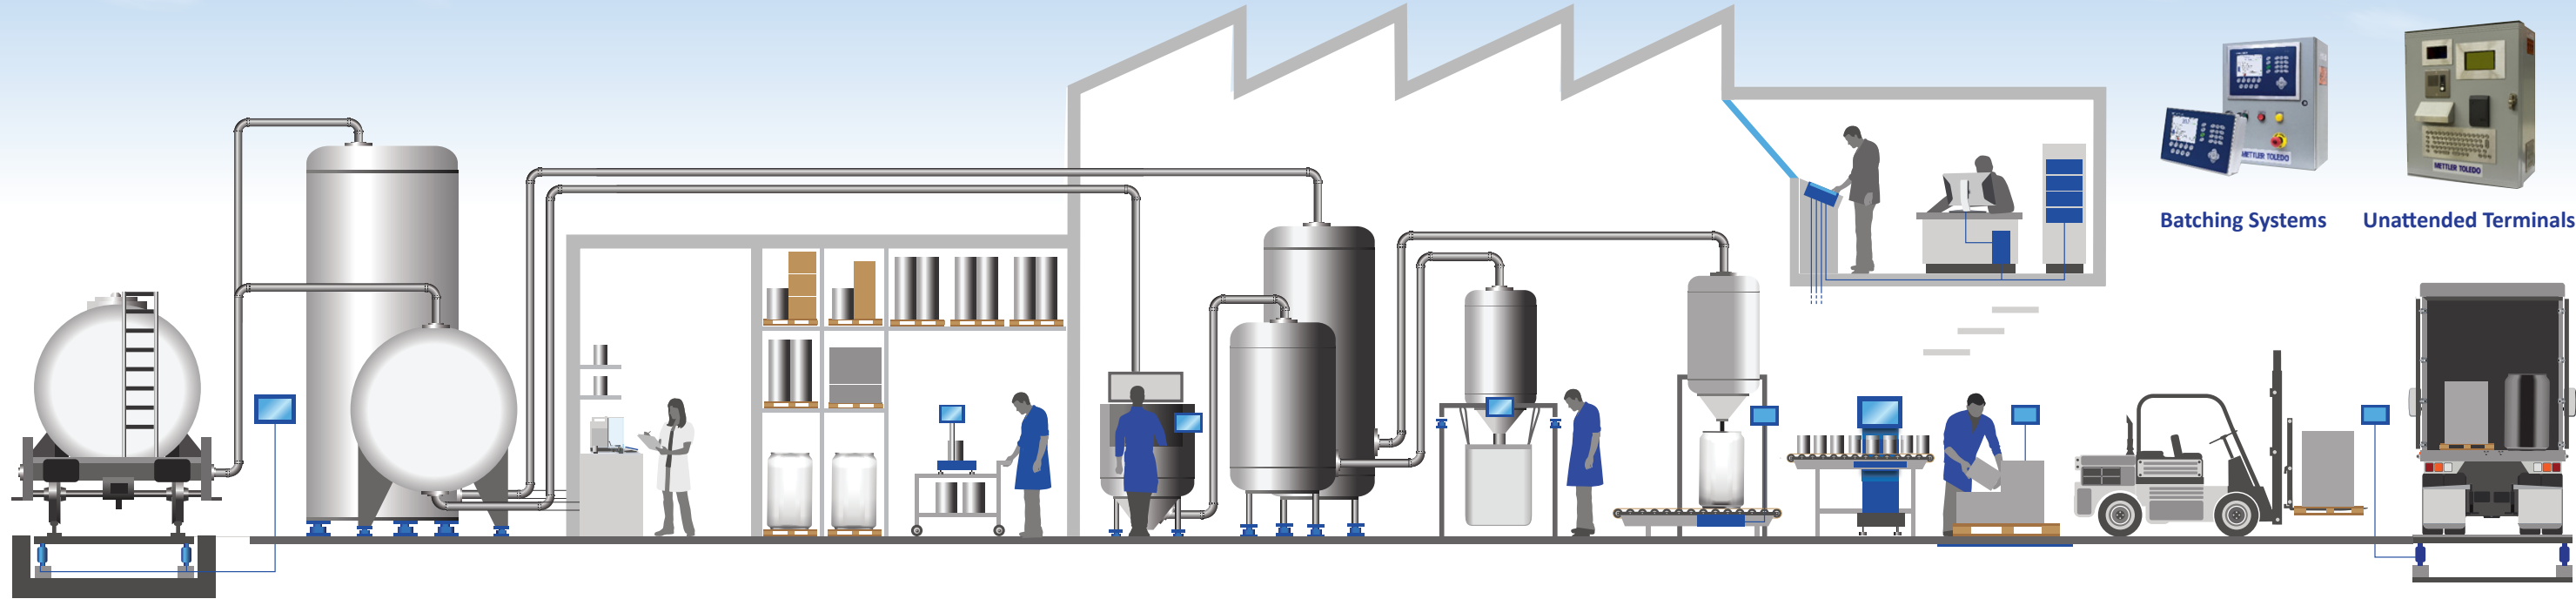

**METTLER TOLEDO**  
Premier Distributor

CarltonScale.com

# Our Solutions Along the Value Chain

We provide technology and service for a comprehensive range of state-of-the-art solutions for each stage of production in multiple industries.

Rail Scales

Tank/Vessel Weighing

Laboratory Scales/Moisture Analyzers

Bench Scales

Counting & Inventory Systems

Custom Solutions

Filling Systems

Check Weighing

Floor Scales

Forklift & Warehouse Scales

Truck Scales

Batching Systems

Unattended Terminals

## PROBLEMS WE SOLVE

### QUALITY

- Consistency
- Repeatability
- First pass yield

### COMPLIANCE

- Traceability
- Data management and accessibility
- Legal-for-Trade requirements

### UPTIME

- Maximize output
- Reduced idle time
- Seamless transitions

### THROUGHPUT

- Faster cycle times
- Reduced error
- Operator simplification
- Custom automation

### PROCESS CONTROL

- Minimize waste
- Reduce secondary processing

### VARIANCE REDUCTION

- Improved Process capability
- Batch control
- Measurement of Uncertainty

## APPLICATIONS SUPPORTED

- Chemical
- Pharma
- Food
- Manufacturing & OEMs
- Vehicle Weighing
- Transport & Logistics

**GWP® – Good Weighing Practice™** – is the global weighing standard that can help ensure the consistent accuracy of any weighing process, independent of equipment make or brand.

### CARLTON SCALE IS UNIQUELY QUALIFIED TO HELP YOU:

- Select the right equipment that is fit for purpose and application
- Understand options that will allow you to achieve your weighing process goals
- Support unique operational and quality requirements
- Minimize unnecessary operational and maintenance costs
